La Pitney Bowes.

Questa tematica non vuole essere la classica rivisitazione di quella grande nazione del mondo, ma bensì lo sviluppo dell'affrancatrice PITNEY & BOWES negli States.

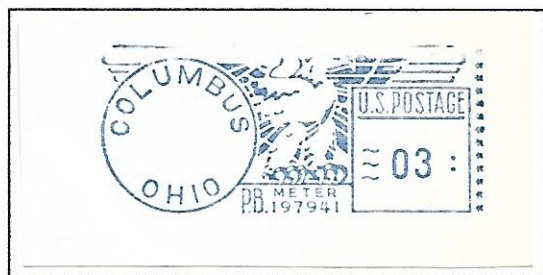

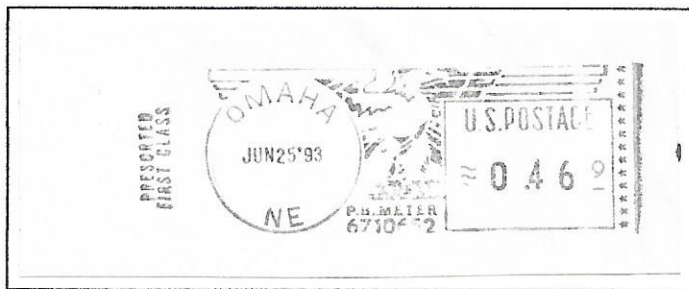

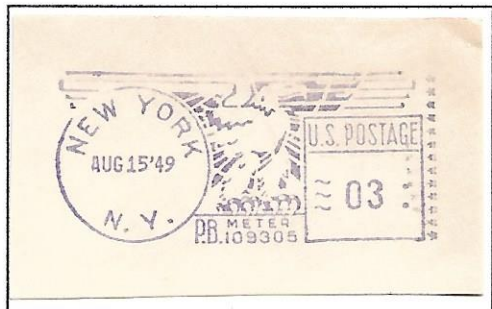

La Pitney & Bowes nasce negli anni 20' grazie all'ingegno dell'ing. Pitney, il quale diede modo al sig. Bowes di sviluppare una macchina che permettesse di effettuare delle affrancature senza l'utilizzo del francobollo.

Arthur N. Pitney
